## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed September 15, 2003 have been fully considered and are considered persuasive.
2. Claims 20-23, 27-28, 55-66 are allowed. The following is an examiner's statement of reasons for allowance: the cited prior art references teach piecemeal features of the claimed invention. However, upon combining the references, there lacks a sufficient nexus between the endeavors of the individual references to yield a reasonable motivation why a skilled artisan would combine them. For example, newly discovered reference Jillette teaches user activated control of valves in a spa as claimed. Henson teaches automatic closing of a valve after a predetermined time as claimed. However, Henson's valve is opened based upon a signal from a probe, and not a user command. Thus, the combination of the entering user commands for opening a valve and automatically closing the same valve after a predetermined time has elapsed after opening the valve in combination with the other recited elements of the pool or spa controller system are not taught or fairly suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
